

Lesson 6: Shape & Form

Pointillism Landscape

Lesson Learning Goal:

The purpose of this lesson is for you to become familiar with the technique of Pointillism and to create your own masterpiece in this style.

What do these items have in common?

Pointillism is a technique where a series of small coloured dots are applied to a page in a strategic way. The patterns that form when the tiny dots come together create a unified larger image. Value can also be achieved in Pointillism.

- For darker sections, dots are placed closer together.
- For lighter sections, dots are spread further apart.

Your task is to create a detailed landscape portrait using the Pointillism technique, just like the painting by Seurat below. Ensure that you add depth to your landscape by playing with the values of your dots.

Success Criteria:

- Landscape has a background and foreground
- Points are clean, neat and intentional
- Multiple shades and colours used to create depth
- The landscape fills the page
